Date: 27 June 2013

Marine Notice No. 18 of 2013

Code of Practice for Marine Fire Service Stations — Approved DOTFAS Stations

TO DOTFAS SERVICE STATIONS, SHIP OPERATORS, MASTERS, SHIPS' AGENTS AND PRINCIPAL OFFICERS

Marine Notice No.3 of 2013 is cancelled

Summary

This marine notice lists the approved marine fire service (DOTFAS) stations as at 19 June 2013

- 1 Regulation 118(3) of the *Life-Saving Equipment Regulations, 1968*, requires all firefighting appliances installed on South African ships to be serviced at intervals not exceeding 12 months by a SAMSMA-approved marine fire service station.
- 2 SAMSMA, in collaboration with the industry, has developed a *Code of Practice for Marine Fire Service Stations (DOTFAS Code)*. The code sets out the standards for the servicing of firefighting appliances; these standards satisfy the requirements of the applicable regulations.
- 3 A firefighting appliance that has been serviced and certified by a marine fire service station approved in terms of the DOTFAS Code will be accepted as having met the requirements of Regulation 118(3).
- 4 The Annex lists the approved marine fire service stations (DOTFAS stations).
- 5 At the time of publication of this marine notice, some marine firefighting service stations are close to the date of expiry of their approval, the onus to renew is left to the service providers. It has been noted that some crafts/boats are operating on inland water areas where the service stations may not be SAMSMA approved; such service stations are still expected to be SABS approved and are urged to register with SAMSMA. Owners, managers, masters and skippers are advised that should firefighting appliances be serviced at a station which has not been approved or whose approval has lapsed, the surveyor may reject this equipment and require it to be re-serviced at an approved station.
